

Did your roof weather the recent hailstorm?

Hail damage may fracture or shred the roofing membrane with its irregular, sharp edges. Rooftop hail damage may not be noticed until cracks, leaks or other structural damage is detected. Small fractures from hail may not open up and cause leaks for months after a storm.

That's why it is a good idea to have a CentiMark roofing expert walk the roof after the storm to be proactive.

CentiMark Corporation
845 Hawthorne Lane
West Chicago, IL 60185
www.CentiMark.com

CentiMark will perform a free, complete roof inspection including the field of the roof, drainage details, wall and penetration flashings and all roof accessories. A condition report with photos will be prepared and include short and long-term roof conditions, as well as a schedule and budget for repair or replacement by our crews. Damage to roof top equipment will also be noted.

Contact John Eichinger to schedule an inspection:
